### **GROSSMAN DEVELOPMENT GROUP HIRES ANALYST**

FRAMINGHAM, MA – Ariel Konover has joined Grossman Development Group (GDG) as the Analyst for the company.

“We are very pleased to have Ariel join us,” said GDG President Howard Grossman. “He brings several years of financial and legal expertise to the firm and will be a valuable contributor to our future growth.”

Konover is a third generation real estate professional, with a concentration in the financial analyzation of development and acquisition projects. Prior to joining GDG, Konover spent five years working in his family’s real estate business, overseeing project underwriting, as well as working closely with the company’s lenders. He holds a Juris Doctorate degree from Nova Southeastern University and was previously a member of The Florida Bar.

At GDG, Konover’s primary responsibilities will include working on development project budgets, merchandising plans and layouts, as well as conducting financial analyses regarding project feasibility and reviewing existing properties for potential acquisition.

“I am very excited to be a part of GDG and work with a group where each individual plays an important role on the team,” Konover said. “I am particularly looking forward to being a part of GDG’s continued success.”
